

Capture the performance.

The Baseball came about from listening to customers; it offers a fast, practical solution to address the universal 'swooshing' noise problem experienced by sound pros when booming.

So the Baseball is fantastic for interior boom pole use... but that's not the whole story. The **Baseball 21/22** is compatible with some very popular mics used for **pro-audio music** applications (e.g. the Neumann KM180 series). This Baseball model is a great choice for recording instruments with these mics – partner it with the Baseball Windjammer to capture the performance in stage/concert environments too.

Baseball

Minimise the 'Swoosh' when booming!

Baseball

A whole new ball game!

This ingenious little 3" windscreen has been designed for interior boom pole use, greatly reducing unwanted 'swooshes' during fast swings and other rapid movements.

The Baseball is fitted with a soft yet durable end-cap. Made of thermoplastic elastomer – a unique plastic and rubber mix – the end-cap helps secure the mic and provides an effective seal against wind. The Baseball comes in '19/20', '21/22' (green end-cap) and '24/25' variants, reflecting compatible microphone diameters in mm.

All versions have the same exterior dimensions, but come with different internal bore diameters to fit a variety of industry-standard microphones.

Features

- Significantly increased performance versus conventional foam windscreens
- Provides -30dB of wind noise attenuation, across the frequency spectrum
- Rapid attachment and removal
- Durable and easily maintained
- Incredibly lightweight – only 17g*
- Offers capsule protection to the mic (during scene 'down-time' and equipment changes)
- Acoustically transparent open cell foam and soft felt cover construction
- Handmade in the UK

*Weights / dimensions approximate

A WHOLE NEW BALL GAME.

Minimise the 'Swoosh' when booming!

Incredibly lightweight (just 17g) and offering significantly increased performance over conventional foam windscreens, the Baseball is ideal for fast/deep booming and plosive reduction. It also helps to protect your mic.

 -30 dB wind noise attenuation

Baseball (19/20)

039701 Baseball, Black (19/20) Single
039703 Baseball, Black (19/20) 3-pack

Compatibility

DPA 4018
Schoeps CMC Series
Sennheiser MKH 8040, MKH 8050

Baseball (21/22)

039705 Baseball, Black (21/22) Single
039706 Baseball, Black (21/22) 3-pack

Compatibility

Audio-Technica AT4049b, AT4051b, AT4053b,
AT4021b, AT4022, AT4041
Neumann KM180 Series (KM183, KM184, KM185)
Sennheiser ME64 K6

Baseball Windjammer®

The Baseball Windjammer is an incredibly useful little add-on product for the Baseball, allowing for even faster/deeper boom swings indoors. Importantly, with the Windjammer fitted, the Baseball can now also be used outdoors in light winds.

The Baseball Windjammer comes in one size, which fits all our Baseball variants, i.e. 19/20mm, 21/22mm and 24/25mm. Weighing just 15g*, the Baseball Windjammer adds very little extra size or weight when fitted to the Baseball.

Adding a Baseball Windjammer to the Baseball brings a very useful extra 10dB of wind noise attenuation, across the spectrum. So, the performance of the Baseball with the Windjammer fitted is -40dB wind noise attenuation, across the frequency spectrum.

 -40 dB wind noise attenuation

You can buy the Baseball Windjammer on its own, or as a 'Combo' pack with the Baseball of your choice.
