

1 More Information

For more information on the Classic-Softie Kit:
<http://rycote.com/microphone-windshield-shock-mount/classic-softie/>

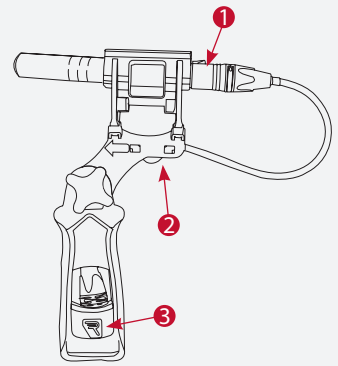

2 Fitting microphone

- Mount base of mic in Duo-Lyre
- Ensure front of mic points in direction indicated

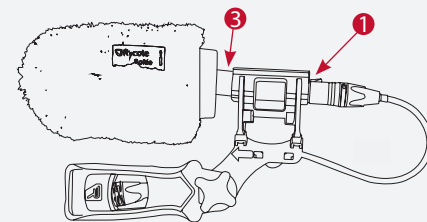

3 Fitting cable to mic

- Plug XLR-3F connector into mic
- Thread cable through built-in cable clips on side opposite star knob
- Secure XLR-3M connector into position near base of pistol grip handle and secure cable in upper groove

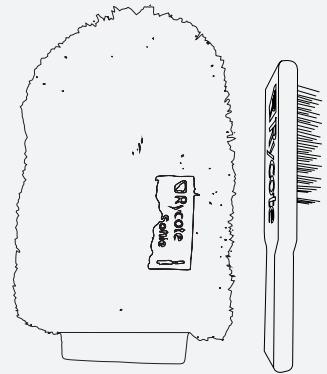

4 Fitting windshield to microphone

- Grasp base of microphone firmly
- Use twisting motion when pushing the Softie onto the mic. This prevents 'grating' over microphone cancellation slots, and preserves internal foam and end-cap integrity
- Ensure full coverage of cancellation slots and capsule portion
- Reverse procedure to remove

5 Fur maintenance

Periodically brush fur to retain optimal windshielding performance.

Our Classic-Softie has set the benchmark for slip-on wind protection for generations of sound professionals.

Classic-Softie® Kit

Professional Microphone Windshield

Quick Start Guide

Classic-Softie® Kit

Thank you for choosing the Classic-Softie® Kit! The following guide provides you with the basics to get you started.

Overview

Our Classic-Softie has set the benchmark for slip-on wind protection for generations of sound professionals.

Perfect for boom mounting or hand-held recording, the Classic-Softie Kit has all the essential components necessary for modern day ENG and location recording.

Classic-Softie Windshield

Rycote® has been designing & manufacturing microphone shock-mounts & windshields since 1969. Our products are designed, engineered and hand-made in the U.K.

The Rycote Classic-Softie is a slip-on microphone windshield that works by creating a controlled area of "still air" around the microphone.

The Classic-Softie is 70 mm in diameter and is constructed from specially manufactured acoustic foam that is then fitted with an integral fur cover. The foam is exclusively designed for us and is not affected by moisture or UV light.

The Classic-Softie synthetic fur is specially made for us and has been extensively tested to provide maximum wind protection.

Advanced materials, adhesives and assembly techniques all combine to make the Classic-Softie an extremely tough product that provides excellent wind protection in the harshest of environments.

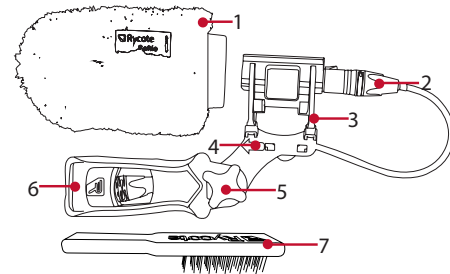

Microphone Cable

Each Classic-Softie Kit is supplied with a high quality microphone cable. Cable specifications: Neutrik® XX series, male to female XLR, black gold 3-pin. Mogami® Ws893 ultra flexible star quad cable (OD 4.8 mm). Pin 1 linked to shell ground. Cable length: 40 cm (15.75").

Rycote Lyre® Suspension

The Rycote Lyre® Suspension provides excellent vibration isolation against handling & camera motor noise and is designed to hold shotgun mics from 19 to 25 mm in diameter, and up to 300 mm in length. The mount with pistol grip allows handheld use or can be mounted directly onto a boom pole via its 3/8" thread.
