1 Fitting microphone

- 1 Separate basket pods from suspension by rotating firmly in direction shown, whilst holding centre chassis ring
- 2 Insert microphone by separating Lyre clips using finger and thumb

Note: Lyres can be detached and moved into other set positions by pressing/squeezing-in their securing latches from the underside of the suspension bar (3).

2 Fitting cable to mic

- 1 Attach XLR-3F connector to microphone

3 Fitting pods to suspension

- 1 Reattach basket pods by lining-up & inserting the three securing hooks with the corresponding slots in the centre chassis ring
- 2 Rotate pods in direction shown, until they "click" firmly into place

Note: The smooth plastic 'strip' which runs along the tubular basket length should ideally be positioned at the bottom.

4 Fur maintenance

Periodically brush fur to retain optimal windshielding performance.

Super-Shield Kit

Windshield kit for shotgun mics

Quick Start Guide
Super-Shield Kit

Quick Start Guide

Super-Shield Kit

Thank you for choosing the Rycote® Super-Shield Kit! The following guide provides you with the basics to get you started.

Overview

The Super-Shield Kit is a complete robust & secure system, offering professional wind and shock isolation for shotgun microphones.

This complete windshield / shock-mount system has a unique “pod” design, for fast microphone access.

There are three kit sizes available to fit your microphone. You can also retrofit your kit with optional front pods and Windjammer®, to adjust your chosen kit to fit a broad range of microphone lengths.

Windshield

The Super-Shield windshield itself consists of two “pods” and a central chassis. The pods attach to the suspension chassis ring by way of a twist-lock system, to completely surround the microphone, connector and suspension.

The robust, plastic netting and discrete lining material create a still volume of air around the microphone, providing excellent wind-noise reduction with minimal high-frequency loss.

Suspension

The Super-Shield suspension uses Rycote patented Lyre® technology for excellent shock and vibration protection for your microphone.

Designed to fit microphones 19mm to 25mm

in diameter (3/4” to 1”), the suspension contains two Rycote Lyre, which with the fast snap-in/ pinch-release system can be fitted in any one of 5 positions, to achieve optimal balance. An 18” (450mm), highly flexible cable is also included and provides protection against cable-borne noise.

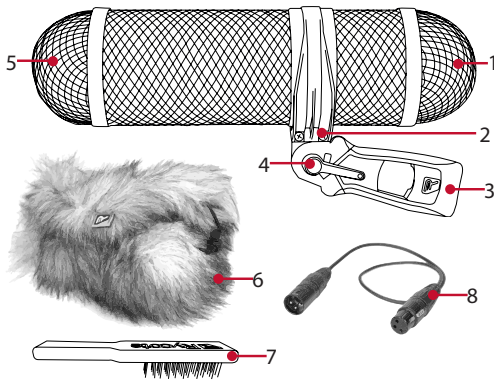

Windjammer®

For an additional level of wind protection, the Super-Shield is supplied with a professional quality Rycote Windjammer.

Handmade in the UK from specially designed and manufactured synthetic fur, the Windjammer fits over the windshield to provides superb wind-noise isolation in extreme wind conditions. The Rycote Windjammer also helps to preserve the integrity of the desired audio source.

1. Rear Pod (one common size)
2. Suspension Chassis Ring
3. Pistol Grip
4. Ratchet Lever
5. Front Pod (Small, Medium or Large)
6. Windjammer® (Small, Medium or Large)
7. Brush for Windjammer
8. 45cm XLR-3F/3M Cable x 1

Compatible Mics

The Super-Shield Kit is ready to use out of the box. Additional pods can be purchased to suit a variety of microphones, adding versatility.

Super-Shield Kit, Small (010320)

Suitable for mics 19/25mm, up to 200mm length

Oktava	MC-012, MK-012
Sanken	CS-1
Schoeps	CMC series, CMC series + CUT1
Sennheiser	ME62 K6, ME64 K6, MKH 8060

Weight & Dimensions

Body length	250mm
Overall Length	350mm
Diameter	100mm
Net Weight	642g

Super-Shield Kit, Medium (010321)

Suitable for mics 19/25mm, up to 200-250mm length

Audio-Technica	AT 4073a, BP4073
DPA	4017b, 4017c
Neumann	KMR-81i, KMR-81D
Røde	NTG-1, NTG-3
Sanken	CS-2
Schoeps	CMIT 5
Sennheiser	MKH 416
Shure	VP82, VP895
Sony	ECM 670, ECM 678

Weight & Dimensions

Body length	300mm
Overall Length	400mm
Diameter	100mm
Net Weight	662g

Super-Shield Kit, Large (010322)

Suitable for mics 19/25mm, up to 250-300mm length

Røde	NTG-2
Sanken	CS-3e
Sennheiser	MKE 600

Weight & Dimensions

Body length	350mm
Overall Length	450mm
Diameter	100mm
Net Weight	692g

Features at a glance

- Robust, complete system for professional wind and shock isolation
- Unique pod design for fast microphone access
- Rycote patented Lyre® suspension - easily adjusted to achieve optimal balance & fit
- Flexible, robust plastic netting with attached lining material
- Excellent wind protection with minimal high-frequency loss
- Windjammer® included for multiple levels of wind isolation
- Available in three sizes to fit microphones up to 300mm in length
- Optional front pods available to change windshield length

What’s in the box?

- Super-Shield Suspension Chassis
- Rear Pod (one common size)
- Front Pod (Small, Medium or Large)
- Windjammer® (Small, Medium or Large)
- Pistol Grip
- 45cm XLR-3F/3M Cable x 1
- Brush for fur maintenance

Optional accessories

Covers

- Hi-Wind Cover
- Duck Raincover

Extra Pods

- Small Pod (010421)
- Medium Pod (010422)
- Large Pod (010423)
