1 More Information

For more information on the USM:
www.rycote.com/microphone-windshield-shock-mount/invision-studio/

2 How to Use

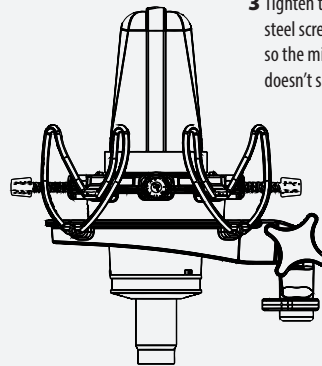

1 Loosen the four steel screws with red grips on the end, so that there is enough space in the center for your chosen microphone

The grip surface of the pads allows the USM to hold the microphone securely

2 Slide the microphone into the centre of the InVision USM

The grip surface of the pads allows the USM to hold the microphone securely

3 Tighten the four steel screws securely so the microphone doesn't shake or slip

Microphones need to be fitted into the InVision® USM so that their centre of gravity is close to the level of the outer ring. You can use a microphone horizontally but at the end of the session please store it vertically.

InVision USM

Professional Microphone Suspension

Quick Start Guide
InVision® Universal Studio Mount

Quick Start Guide

InVision USM

Thank you for choosing the Rycote Studio Shock Mount! The following Quick Start Guide provides you with the basics to get you started; and applies to the following models;

Overview

A Better Microphone Suspension

Rycote® is renowned throughout the entertainment, recording and broadcast industries for its skill in isolating microphones from unwanted noise.

Product View

4. Cable Clip
5. Lower Suspension
6. Upper Suspension

The InVision® USM uses the Rycote patented Lyre® technology to suspend studio microphones safely, and isolate them from the low frequency thumps and rumbles that are transmitted through microphone stands.

Features:

- Advanced protection from vibration, shock and plosives in studio & live sound environments – to help you capture the performance – perfectly;
- Unparalleled Flexibility - With unprecedented fast set-up in studio and live applications;
- Microphones can be orientated vertically and horizontally;
- The universal shock-mount designed to fit practically all of your side-address microphones;
- Unique, adjustable universal locking system is quickly adjusted and provides equal isolation around 360°;
- With Rycote patented Lyre technology, the USM will not sag or need re-threading - and provides an additional 12dB of isolation, compared to conventional elastic suspensions.

Optional Accessories

- Universal Pop Filter (045001)
- Spare Foams - Pack of 5 (045004)

The pop filter's ergonomic frame is designed for placement near the mouth and face of a vocal artist, and fits a specially manufactured acoustic foam mesh filter, which can be removed for cleaning or replacement

Studio Kits

The following Studio Kits are available from Rycote:

- InVision USM Studio Kit (045002)
- InVision USM-L Studio Kit (045003)
- InVision USM-VB Studio Kit (045005)
- InVision USM-VB-L (045007)

The InVision Studio Kit is a complete suspension and pop filter system, which combines the USM with a new Universal Pop Filter to make a complete vocal microphone suspension and pop filter system that will accommodate virtually any microphone. The Pop Filter is designed to lock tightly on the USM's outer support ring, where it can be left while mics are quickly and easily swapped in the USM.
